

SNACKS'N JAXSON™

SNACKS'N JAXSON™ is a unique game built around a clown who tries to eat his way through life without letting his nose break any windows. The player moves the clown's head around the screen to chase down and gobble food. At the beginning of each wave, the clown sneezes his nose off and the gamer must move the face to keep the nose from bouncing into a window. The game controls consist of a trackball, to move the clown head, and a sneeze button. The sneeze button is used to blow away hot peppers and soap placed in the clown's path by his arch enemy. The game graphics are striking. Snacks'n Jaxson also offers select-a-level.
